

FelixWood

BAMBOO BOARD SAMBA 139

- High quality Bamboo
- Thermally modified and laminated under pressure
- Very durable and stable
- Hidden fixation with Cobra Hybrid 7-22 clip
- Foreseen from oil (water basis)

Samba

An innovative material for a natural deck

The SAMBA decking board is an industrially manufactured, heat-treated bamboo board. It benefits from an exclusive, patented treatment that gives it a light colour and enhanced durability. Available with an oiled (water-based) coating, SAMBA boards are installed using Cobra® Hybrid 7-22 invisible clips. Given the pressure on forest resources, it is essential to offer alternatives to wood for certain uses. FelixWood® bamboo is an excellent response.

Environment

LIFETIME	> 20 years
GHG EMISSIONS	0.628 (GES)
RECYCLED MATERIAL	bamboo thermo
END OF LIFE RECYCLABILITY	0 %
CERTIFICATION	None

Characteristics

Cutable	oui
Specie	Bamboo
Origin (country)	China
Treatment	Thermo-treatment
Main material	Bamboo
Profil	Hybrid - Smooth / grooved
Installation type	Installation with clips
	Decking
Certification	None
Scientific name	Phyllostachus Pubescens,

Botanical family	POACEES
Stability	Stable
Durability for fungus	Very durable
Durability to termites	Very durable
Class of use	Classe 4
Density (kg/m3)	1200
Linear mass (kg/m)	3
Hardness (Brinell) N/mm2	8.61
Modulus of elasticity (Mpa)	14060
Reversible profile	oui
