Aluminium joist 40×60 mm for terrace

The STRUCTURAL system ensures a rot-proof structure with unparalleled lifespan. Unlike wood, aluminum is not subject to any deformation or deterioration of its qualities over time. As load-bearing elements, STRUCTURAL joists are very suitable for installing elevated structures on pedestals or foundation screws. The system's modularity allows both installation of composite or wood decking boards and laying of porcelain stoneware paving.

Environment

LIFETIME	> 20 years
GHG EMISSIONS	8.21 (GES)
RECYCLED MATERIAL	Aluminium
END OF LIFE RECYCLABILITY	0 %

STRUCTURAL - ALU JOIST 40X60MM

Characteristics

Cuttable	oui
Main material	Aluminium
Material thickness (mm)	2
Finishing	Coating
	Decking
Linear mass (kg/m)	undefined
Kind of installation	Clipsable
