

STRUCTURAL - ALUMINUM JOIST 80X60MM

- Lifespan - rot-proof
- Lightweight and robust
- Precision and regularity
- One side decking, one side paving
- Black lacquer RAL 9005

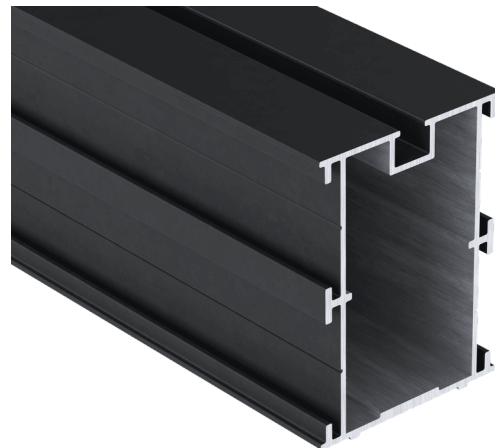

4000mm

2000mm

Aluminium joist 80×60 mm for terrace

The STRUCTURAL system ensures a rot-proof structure with unparalleled lifespan. Unlike wood, aluminum offers regularity and precision and is not subject to any deformation or deterioration of its qualities over time. As load-bearing elements, STRUCTURAL joists are very suitable for installing elevated structures on pedestals or foundation screws. The system's modularity allows both installation of composite or wood decking boards and laying of porcelain stoneware paving.

Environment

LIFETIME	> 20 years
GHG EMISSIONS	8.21 (GES)
RECYCLED MATERIAL	Aluminium
END OF LIFE RECYCLABILITY	10 %

STRUCTURAL - ALUMINUM JOIST 80X60MM

Characteristics

Main material	Aluminium
Finishing	Coating
	Decking
Kind of installation	Clipsable
