Proven stability and durability

Fiberdeck® Brooklyn Premium composite decking boards have a solid core for greater durability. They are available with 2 useful faces. One is smooth for a contemporary look, the other one shows a wood grain. Both sides are brushed to give a matt surface. The 360° co-extruded protective layer effectively protects the board against knocks and stains. This reduces maintenance to a minimum. Installation is carried out using Cobra® 8-18 removable clips.
