

BAMBOO BOARD MELODY 139

- High quality Bamboo
- Thermally modified and laminated under pressure
- Very durable and stable
- Hidden fixation with Cobra Hybrid 7-22 clip
- Foreseen from oil (water basis)

A multi-purpose dense and durable bamboo board

MELODY bamboo boards are manufactured using an innovative process of high-density compression of the bamboo fibres, followed by heat treatment at 200°. The bamboo fibres are glued together at very high temperatures to produce a dense, stable and durable material. This material is perfectly suited to use as decking or cladding, because it looks and behaves like tropical hardwood. MELDOY boards are also extremely stable, so can be installed using Cobra® Hybrid 7-22 clips.

Environment

LIFETIME	> 20 years
GHG EMISSIONS	0.628 (GES)
RECYCLED MATERIAL	bamboo thermo
END OF LIFE RECYCLABILITY	0 %
CERTIFICATION	None

Characteristics

Cutable	oui	Botanical family	POACEES
Specie	Bamboo	Stability	Stable
Origin (country)	China	Durability for fungus	Very durable
Treatment	Thermo-treatment	Durability to termites	Very durable
Main material	Bamboo	Class of use	Classe 4
Profil	Hybrid - Smooth / grooved	Density (kg/m3)	1150
Installation type	Installation with clips	Linear mass (kg/m)	3.05
	Decking	Hardness (Brinell) N/mm2	8.61
Certification	None	Modulus of elasticity (Mpa)	14060
Scientific name	Phyllostachus Pubescens,	Reversible profile	oui
