

SELF ADHESIVE EPDM BAND 5X10MM (20M)

- Self-adhesive
- Cushioning
- Sound insulation
- Set of 2 rolls (2 × 10m)
- 5 mm thickness

Self-adhesive EPDM strip for decking or paving installation on Structural aluminium joists

Self-adhesive 5mm thick EPDM tape for deck installation on Structural aluminum joists. Allows cushioning of ceramic tiles on metal and compensating for slight level differences. Provides sound insulation under the tile. 10mm wide. 2 strips required, on either side of the joist surface. 20ml of tape for 10ml of joists, i.e. approximately 4.5 m2 of deck.

Environment

LIFETIME	> 20 years
GHG EMISSIONS	0.32 (GES)
RECYCLED MATERIAL	rubber
END OF LIFE RECYCLABILITY	100 %

SELF ADHESIVE EPDM BAND 5X10MM (20M)

Characteristics

Installation type	To glue
Material thickness (mm)	5
Main material	EPDM
	Decking
Cuttable	oui
Resists temperature variations	oui
