KAPUR POST 68X68MM – P511

- ◆ KAPUR TROPICAL HARDWOOD
- ◆ DURABILITY CLASS 2
- ◆ FSC 100% CERTIFIED
- ◆ NEAT PROFILE, V-GROOVES (P511)
- ◆ EQUIPPED WITH POINTED ENDING

RED BROWN

The Kapur comes from lowland tropical forests in Indonesia. Well-formed foothills support their straight and cylindrical trunk, and the trunk is free of branches up to 30 m, which explains their uniformity. Renowned for its durability, Kapur is a hard wood used for outdoor construction. It is often used as a substitute for Bangkirai. Kapur is initially reddish-brown to orange and quickly darkens to brown under the influence of UV.

◆ Environment

CERTIFICATION

FSC®-certified

KAPUR POST 68X68MM – P511

◆ Characteristics

Specie	Kapur	Class of use	Classe 4
Treatment	No treatment	Density (kg/m3)	740
Main material	Wood	Modulus of elasticity (Mpa)	16150
Origin (country)	Indonesia	Categorie	Fencing
Certification	FSC®-certified		
Scientific name	Dryobalanops sp.		
Botanical family	DIPTEROCARPACAE		
Drying	KD 18 +/-2%		
Durability for fungus	Very durable		
Durability to termites	Very durable		

◆ Logistics Data
