

SPIRAL - FOUNDATION SCREW G-1500

- Alternative to concrete
- Reinforced galvanization Z600
- Efficient ground anchoring
- Allows drainage
- No soil excavation for foundation

Galvanized steel screw stake 60×1500mm for anchoring terrace structures into the ground

Reinforced galvanized steel foundation screw designed to anchor in the ground a wood or aluminum structure composed of crossed beams and joists. Must be driven into loose soil and backfill to a minimum depth of 80 cm. Effectively and economically replaces concrete. Each screw can support a load of 1000 kg. Available in lengths of 800mm, 1200mm and 1500mm. Diameter 60mm. Supplied without support fixing head.

Environment

LIFETIME	> 20 years
GHG EMISSIONS	3.546 (GES)
RECYCLED MATERIAL	Galvanized steel
END OF LIFE RECYCLABILITY	0 %
CERTIFICATION	None

SPIRAL - FOUNDATION SCREW G-1500

Characteristics

Main material	Galvanised steel
Certification	None
	Fasteners
