

SPIRAL – FOUNDATION SCREW G-800

- ◆ EFFICIENT ANCHORING
- ◆ NO SOIL TO EVACUATE
- ◆ SLOPE CORRECTOR
- ◆ ALTERNATIVE TO CONCRETE

NULL

◆ Galvanized steel screw size 60x800mm for anchoring terrace structures into the ground

Galvanized steel foundation screw designed to anchor a wooden or aluminum structure composed of beams and crossed joists into the ground. It must be driven into loose soil and backfilled to a minimum depth of 70 cm. Effectively and economically replaces concrete. Each screw can support a load of 475 kg. Available in lengths of 800mm, 1200mm, and 1500mm. Diameter of 60mm. Delivered without support fixing head.

◆ Environment

SPIRAL – FOUNDATION SCREW G-800

◆ Characteristics

Main material	Galvanised steel
Material thickness (mm)	3
Finishing	Hot dip galvanisation
