

COBRA® HYBRID 8-18 (90 CLIPS+SCREWS)

- Compatible with most grooved composite boards on the market
- High pull-out resistance
- Pre-installed screw - 3 sizes available S/M/L
- Self-drilling - Fixing in wood or aluminum
- No pre-drilling required - Screwing bit included

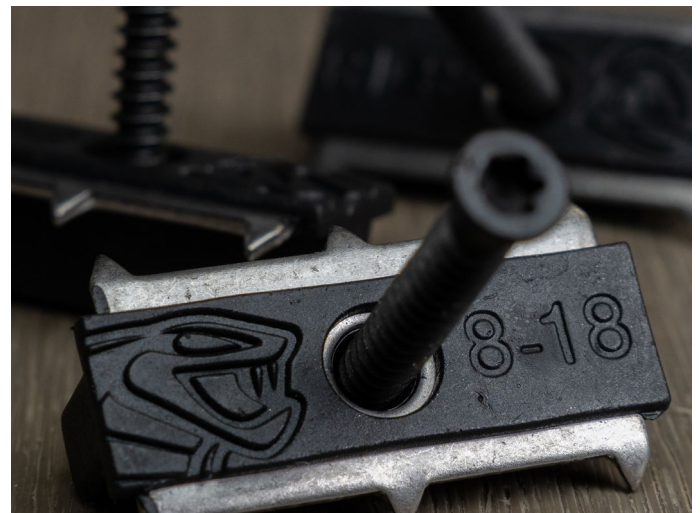

4,2 × 27mm (S) 4,2 × 35mm (M) 4,8 × 43mm (L)

Universal bi-material clip for composite and thermo-modified wood deck boards

Bi-material clip composed of a stainless steel fin with claws and a honeycomb body in high-density polypropylene. Pre-equipped with a high-performance self-drilling C1 stainless steel screw. Suitable for composite wood decking. Universal, compatible with reversible boards from 20 to 24 mm thick and maximum 150 mm wide. Fixing on wood or aluminum joists. Respects and controls decking movements. Simple and quick assembly. Local disassembly possible
