ROBINIA DECKING 22X120MM - P417

- ◆ EXCELLENT STABILITY
- ◆ TO FIX WITH STAINLESS STEEL SCREWS

NULL

◆ Naturally, the most sustainable local wood

Robinia or "false acacia" is the most sustainable European wood without any preservatives. Our Robinia comes from the forests of Hungary, where it has been widely planted and currently accounts for 20% of the forest. It has a straight grain and a warm yellow to greenish-yellow colour. The wood develops a patina with silver-grey reflections as it ages. All our boards are finger-jointed (on edge) for greater stability and good looking.

◆ Environment

ROBINIA DECKING 22X120MM – P417

◆ Characteristics

Specie	Robinia	Density (kg/m ³)	740
Scientific name	Robinia pseudoacacia	Linear mass (kg/m)	1.95
Botanical family	FABACEES	Hardness (Brinell) N/mm ²	48
Origin (country)	Hungary	Modulus of elasticity (Mpa)	16900
Drying	KD 18 +/-2%	Way of installation	To screw
Stability	Medium stability	Reversible profile	oui
Durability for fungus	Very durable	Joist spacing (mm)	450
Durability to termites	Very durable		
Treatment	No treatment		
Class of use	Classe 4		

◆ Logistics Data
