KAPUR POST 68X68MM - P511

- Kapur Tropical Hardwood
- Durability class 2
- FSC 100% certified
- Neat profile, V-grooves (P511)
- Equipped with pointed ending

Red brown

The Kapur comes from lowland tropical forests in Indonesia. Well-formed foothills support their straight and cylindrical trunk, and the trunk is free of branches up to 30 m, which explains their uniformity. Renowned for its durability, Kapur is a hard wood used for outdoor construction. It is often used as a substitute for Bangkirai. Kapur is initially reddish-brown to orange and quickly darkens to brown under the influence of UV.

Environment

CERTIFICATION

FSC®-certified

Characteristics

Main material	Wood	Class of use	Classe 4
Specie	Kapur	Density (kg/m3)	740
Origin (country)	Indonesia	Modulus of elasticity (Mpa)	16150
Treatment	No treatment		Fencing
Certification	FSC®-certified		
Scientific name	Dryobalanops sp.		
Botanical family	DIPTEROCARPACAE		
Drying	KD 18 +/-2%		
Durability for fungus	Very durable		
Durability to termites	Very durable
