

A multi-purpose dense and durable bamboo board

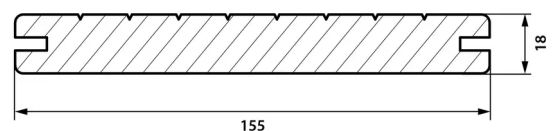

MELODY bamboo boards are manufactured using an innovative process of high-density compression of the bamboo fibres, followed by heat treatment at 200°. The bamboo fibres are glued together at very high temperatures to produce a dense, stable and durable material. This material is perfectly suited to use as decking or cladding, because it looks and behaves like tropical hardwood. MELDOY boards are also extremely stable, so can be installed using Cobra® Hybrid 7-22 clips.

FelixWood

BAMBOO BOARD MELODY 155

- Very durable and stable
- Thermally modified and laminated under pressure
- 2 different usefull faces
- Hidden fixation with Cobra Hybrid 7-22 clip
- Foreseen from oil (water basis)

Environment

LIFETIME	> 20 years
GHG EMISSIONS	0.628 (GES)
RECYCLED MATERIAL	bamboo thermo
END OF LIFE RECYCLABILITY	0 %
CERTIFICATION	None

Characteristics

Specie	Bamboo
Origin (country)	China
Treatment	Thermo-treatment
Main material	Bamboo
Profil	Hybrid - Smooth / grooved
Installation type	Installation with clips
	Decking
Certification	None
Scientific name	Phyllostachus Pubescens
Botanical family	POACEES

Stability	Stable
Durability for fungus	Very durable
Durability to termites	Very durable
Class of use	Classe 4
Density (kg/m3)	1150
Linear mass (kg/m)	3.4
Hardness (Brinell) N/mm2	8.61
Modulus of elasticity (Mpa)	14060
Reversible profile	oui
Joist spacing (mm)	400
