

WEO® CLADDING - 4,2X38MM SCREWS (100PCS)

- Discreet screwing
- Matched-colors to the boards
- Self-drilling A2 (AISI 304) stainless steel screw
- Torx head screw
- Timber to timber or Timber to aluminum

Discreet fastening for WEO cladding

4.2×38mm A2 stainless steel cladding screws allows to fasten WEO35 and WEO60 cladding boards to wood and aluminum frame. Screwing is made in the bottom of the wave. Head screw is coated in the same colours as composite cladding boards : very discreet to ensure the harmony of facades in the best possible way. WEO screw are easy-to-use and facilitates maintenance operations.
